BIRLA INSTITUTE OF TECHNOLOGY & SCIENCE, PILANI WORK INTEGRATED LEARNING PROGRAMMES Digital Learning

Part A: Content Design

Course Title	Artificial Intelligence
Course No(s)	IS ZC444 / SS ZC444/SE ZC444
Credit Units	3
Course Authors	Vimal SP, Raja vadhana P
Version No	1.0
Date	July 09, 2019

Course Objectives

No	Course Objective	
CO1	To provide solid foundation for designing intelligent agents	
CO2	Learn the representation and use of knowledge in inference-based problem solving approaches	
CO3	Learn to apply probability theory to describe and model agents operating in uncertain environments	
CO4	Learn the optimization models of computation and processing in real world application of intelligent agents	

Text Book(s)

T1	Stuart Russell and Peter Norvig, "Artificial Intelligence – A Modern Approach", Pearson Education, Third Edition.
T2	Elaine Rich and Kevin Knight, "Artificial Intelligence", Tata McGraw Hill Publishing Company, New Delhi, 2003

Reference Book(s) & other resources

Modular Content Structure

No	Title of the Module	References
M1	Introduction to AI	T1: Chapter 1, 2, 18.1
	1.1. History	R1: Chapter 2
	1.2. Intelligent Agent & Environment	R2: Chapter 1
	1.3. Role of Learning	•
	1.4. Expert Systems	
	1.4.1.Stages of Development	
	1.4.2.Structure of Knowledge base	
M2	Problem Solving: Knowledge representation and	T1: Chapter 3, 7, 9.1, 9.2, 14.7
	Inference	T2: Chapter 6.1, 6.2, 11, 3.5
	2.1 Search Strategies	
	2.1.1 Uninformed	
	2.1.2 Informed	
	2.2 Representation	
	2.2.1. Logic	
	2.2.2. Rule system & Fuzzy system	
	2.2.3. Semantic Nets	
	2.2.4. Objects	
	2.3 Planning	
M3	Reasoning: Static and Dynamic	T1: Chapter 9.2- 9.5, 13, 14.1 -14.4
1115	3.1 Monotonic	71. Chapter 3.2 3.5, 15, 11.1 11.1
	3.1.1 Forward Chaining	
	3.1.2 Backward Chaining	
	3.2 Non-Monotonic	
	3.2.1 Probability	
	3.2.2 Bayesian Networks	
	3.3 Introduction to Hidden Morkov Model	
M4	Introduction to Learning	T1: Chapter 18.2, 18.3, 18.7, 21.1-21.3,
1111	4.1 Supervised - Induction	21.6
	4.2 Unsupervised	T2: Chapter 17.4 -17.7, 18.2-18.4
	4.3 Reinforcement Learning	http://www.deeplearningbook.org/content
	4.4 Neural Network & Deep Learning	s/intro.html
	With the state of the property of the state	Page 1-8
M5	Optimization Models	T1: Chapter 4.1
1115	5.1 Hill climbing Algorithm	http://www.globalspec.com/reference/661
	5.2 Genetic Algorithm	98/203279/chapter-11-introduction-to-
	5.3 Ant Colony Optimization	particle-swarm-optimization-and-ant-
	5.4 Particle Swarm Optimization	colony-optimization
M6	AI Application 1 : Gaming	T1 : Chapter 5
1110	6.1 AI & Gaming	T2: Chapter 12
	6.2 Dynamic Programming & Backtracking	12. Chapter 12
	6.3 Min-Max Algorithm	
	6.4 Alpha – beta Pruning	
M7	AI Application 2 : Natural Language Processing	T2: Chapter 15
141 /	7.1 Process	T1: Chapter 13
	7.1 Trocess 7.2 Syntax & Semantics	11. Chapter 22, 23
	7.2 Syntax & Semantics 7.3 Disambiguation & Information retrieval	
M8	Anatomy of building AI systems	T1: Chapter 25
1110	8.1 Shortcomings of AI	R4, R5 Chapter 6
	8.2 Building Fair models	K4, K3 Chapter 0
	_	
	8.3 Interpretable models	

Learning Outcomes:

2001111111	Guttomesi
No	Learning Outcomes
LO1	Understand the environment and process of development to build intelligent agents
LO2	Identify heuristics to pursue goals in exponentially large search spaces.
LO3	Represent problem and derive reasoning using logical inferences
LO4	Apply probability theory to describe and model agents operating in uncertain environments
LO5	Analyse ways to supervise agents to learn and improve their behaviour.

Part B: Course Handout

Academic Term	First Semester 2023-2024
Course Title	Artificial Intelligence
Course No	IS ZC444 / SS ZC444/SE ZC444
Lead Instructor	KAMLESH TIWARI

Glossary of Terms

- 1. Contact Hour (CH) stands for a hour long live session with students conducted either in a physical classroom or enabled through technology. In this model of instruction, instructor led sessions will be for 22 CH.
 - a. Pre CH = Self Learning done prior to a given contact hour
 - b. During CH = Content to be discussed during the contact hour by the course instructor
 - c. Post CH = Self Learning done post the contact hour
- 2. Contact Hour (CS) stands for a two-hour long live session with students conducted either in a physical classroom or enabled through technology. In this model of instruction, instructor led sessions will be for 11 CS.
 - a. Pre CS = Self Learning done prior to a given contact session
 - b. During CS = Content to be discussed during the contact session by the course instructor
 - c. Post CS = Self Learning done post the contact session
- 3. RL stands for Recorded Lecture or Recorded Lesson. It is presented to the student through an online portal. A given RL unfolds as a sequences of video segments interleaved with exercises
- 4. SS stands for Self-Study to be done as a study of relevant sections from textbooks and reference books. It could also include study of external resources.
- 5. LE stands for Lab Exercises
- 6. HW stands for Home Work.
- 7. M stands for module. Module is a standalone quantum of designed content. A typical course is delivered using a string of modules. M2 means module 2.

Teaching Methodology (Flipped Learning Model)

The pedagogy for this course is centered around flipped learning model in which the traditional class-room instruction is replaced with recorded lectures to be watched at home as per the student's convenience and the erstwhile home-working or tutorials become the focus of classroom contact sessions. Students are expected to finish the home works on time.

Contact Session Plan

- Each Module (M#) covers an independent topic and module may encompass more than one Recorded Lecture (RL) or Lecture Segment (LS).
- Contact Sessions (2hrs each week) are scheduled alternate weeks after the student watches all Recorded Lectures (RLs) of the specified Modules (listed below) during the previous week
- In the flipped learning model, Contact Sessions are meant for in-classroom discussions on cases, tutorials/exercises or responding to student's questions/clarification--- may encompass more than one Module/RLs/CS topic.
- Contact Session topics listed in course structure (numbered CSx.y) may cover several RLs; and as per the pace of instructor/students' learning, the instructor may take up more than one CS topic during each of the below sessions.

Detailed Structure

- Each of the sub-modules of **Recorded Lectures** (indicated by RLx.y / LS x.y / LSx.yVz) shall delivered via **30 60mins videos** followed by:
- Contact session (CSx.y) of 2Hr each for illustrating the concepts discussed in the videos with exercises, tutorials and discussion on case-problems (wherever appropriate); contact sessions (CS) may cover more than one recorded-lecture (RL) videos.

Course Contents

Time	Type	Description	References		
	M1: Introduction to AI				
Pre-CS	RL 1.1	RL 1.1.1. Course Introduction RL 1.1.2. Introduction to AI RL 1.1.3. Definition & History RL 1.1.4. Intelligent Agent & Environment			
	RL 1.2	RL 1.2.1. Role of Learning & Expert System			
During CS	CS 1.1	CS 1.1.1. Review of concepts covered in the Recorded lecture CS 1.1.2. Discuss use case for designing expert system CS 1.1.3. Problem on identifying the PEAS description given a problem statement and the nature of task environment			
Post-CS	LE 1.1				
	SS 1.1				
	HW 1.1	Identify & describe the PEAS of the task environment	T1: Exercise 2.4		
	QZ 1.1				

Lab Reference			
	M2: I	Problem Solving: Knowledge representation and Infe	rence
Pre-CS	RL 2.1	Search Strategies: Informed & Uninformed	
	RL 2.2	RL 2.2.1. Logic: Predicate & Propositional Logic RL 2.2.2. Rule & Fuzzy System RL 2.2.3. Semantic Nets RL 2.2.4. Classes, Objects & Events	
During CS	CS 2.1	CS 2.1.1. Review of concepts covered in Recorded Lecture. CS 2.1.2. A* algorithm efficiency. Problem in searching techniques CS 2.1.3. AO* Algorithm – AND-OR Graphs	
	CS 2.2	CS 2.2.1. Solve one problem in each predicate & propositional logic CS 2.2.2. Encoding Query into Semantic net representation and Convert into frames	
	CS 2.3	CS 2.3.1. Planning – Goal stack ,Non-linear & Hierarchical planning CS 2.3.2. Constraint Satisfaction Problem	T2: Chapter 13
Post-CS	LE 2.1	Implement Informed and Uniformed Search	<u>Lab.No.1</u>
	SS 2.1	Planning	T2: Chapter 13
	HW 2.1	Understand the syntax-Semantics of predicate logic & Logic Resolution	T1: Exercises 8.9, 8.24, 9.23
	QZ 2.1		
Lab Reference			
		M3: Reasoning: Static and Dynamic	
Pre-CS	RL 3.1	Monotonic Reasoning : Forward & Backward Chaining	
	RL 3.2	RL 3.2.1. Non-monotonic - Probabilistic Reasoning & Bayesian Networks RL 3.2.2. Introduction to HMM	
During CS	CS 3.1	CS 3.1.1. Review of concepts covered in the Recorded lectures CS 3.1.2. Solve Problem by inference using forward chaining, backward chaining CS 3.1.3. Solve problem in Bayesian network	T2: Chapter 8.3, 8.4
Post-CS	LE 3.1	Simulate the working of inference in a rule based system	Lab.No.2
	SS 3.1	Implement logical reasoning for Wumpus world problem	Chapter 13.6
	HW 3.1	Formulation of Bayesian Networks alone can be worked out in the exercise problem.	T1: Exercise 15.13

Detailed Plan for Lab work/Design work

Lab No	Lab Objective	Lab Sheet/Capsule Access URL	Content Reference
1	Implement Informed and Uniformed Search	TBU	Module 2.1 - Search Strategies
2	Simulate the working of inference in a rule based system	TBU	Module 2.2, 3.1: Unification & Resolution
3	Familiarize with the working of Learning algorithms	TBU	Module 4.1, 4.3 Decision Trees & Reinforcement Learning
4	Understand the implementation of Optimizations in Problem Solving	TBU	Module 5.2 : Genetic Algorithm
5	Understand the design of Gaming	TBU	Module 6.3 Min-Max Algorithm
6	Familiarize with the basics of natural language processing	TBU	Module 7
7	Apply right technique to build AI system	TBU	Module 8

Select Topics and Case Studies from business for experiential learning

<Tailored to instructor's delivery in discussion with the lead faculty of the programme>

Topics No.	Select Topics/Case Studies in Syllabus for experiential learning	Access URL

Evaluation Scheme:

Legend: EC = Evaluation Component; AN = After Noon Session; FN = Fore Noon Session

No	Name	Type	Duration	Weight	Day, Date, Session, Time	
EC-1	Quiz-I	Online	-	5%	September 1-10, 2023	
	Quiz-II	Online	-	5%	October 1-10, 2023	
	Assignment / Lab	Offline	-	20%	November 1-10, 2023	
EC-2	Mid-Semester Test	Open	2 Hours	30%	Friday, 22/09/2023 (AN)	
		Book			Friday, 22/09/2023 (AN)	
EC-3	Comprehensive	Open	2½ Hours	40%	Friday, 24/11/2023 (AN)	
	Exam	Book			Friday, 24/11/2023 (AN)	

Important Information:

Syllabus for Mid-Semester Test (Open Book): Topics in CS 1-5. Syllabus for Comprehensive Exam (Open Book): All topics given in plan of study

Evaluation Guidelines:

- 1. For Closed Book tests: No books or reference material of any kind will be permitted. Laptops/Mobiles of any kind are not allowed. Exchange of any material is not allowed.
- 2. For Open Book exams: Use of prescribed and reference text books, in original (not photocopies) is permitted. Class notes/slides as reference material in filed or bound form is permitted. However, loose sheets of paper will not be allowed. Use of calculators is permitted in all exams. Laptops/Mobiles of any kind are not allowed. Exchange of any material is not allowed.
- 3. If a student is unable to appear for the Regular Test/Exam due to genuine exigencies, the student should follow the procedure to apply for the Make-Up Test/Exam. The genuineness of the reason for absence in the Regular Exam shall be assessed prior to giving permission to appear for the Make-up Exam. Make-Up Test/Exam will be conducted only at selected exam centres on the dates to be announced later.

It shall be the responsibility of the individual student to be regular in maintaining the self-study schedule as given in the course handout, attend the lectures, and take all the prescribed evaluation components such as Assignment/Quiz, Mid-Semester Test and Comprehensive Exam according to the evaluation scheme provided in the handout.
